

Minutes of Meeting

Title: Intern daily progress update

Date: 04-05-2026

Time: 11:30 PM

Participants:

- Sabareeshwaran
- Samuel
- Sahaya Sherin
- Anto Jeffrin
- Keethana

Agenda

1. Discussion on updates of each tool.

S.No	Action Items	Action Owner	Deadline
1	Refine Outlook email integration, update the user manual with screenshots, and share the zipped project by EOD.	Keerthana	05/05/2026
2	Include screenshots in the release notes document and share the updated document via email once completed.	Sahaya Sherin	05/05/2026
3	Implement multi-file upload per task, display all task details and uploaded files in a tooltip when "View Report" is clicked in the log page (with file selection, download, and view options), and add screenshots to the user manual.	Anto Jeffrin	05/05/2024

Summary of Discussion

1. MATLAB License Tool

- Sherin presented the latest updates on the release notes.
- The content and changes were reviewed by the team.

Feedback / Suggestions:

- Add relevant screenshots to the document for better clarity and understanding.
- Ensure the document is complete and visually clear.

2. Pool Vehicle Management Tool

- Keerthana presented the initial modifications for Outlook email integration, focusing on mail formatting and testing.
- The progress was reviewed as a trial implementation to validate Outlook-based email workflows.
- Samuel suggested enhancing the User Manual by adding relevant user interface screenshots for better clarity.
- It was also discussed to share the complete project as a zipped file by end of day (EOD).

3. Maintenance Scheduling Tool

- Anto presented a new update – Added a log section to the environment page.
- Team reviewed the change. Samuel suggested the following enhancements:
 - a. Allow users to upload more than one file while completing a task.
 - b. In the log page, when the user clicks “View Report”, all task details and all relevant uploaded files should be displayed inside a tooltip.
 - c. From that tooltip, the user should be able to select a file, download it, and view it.
 - d. Samuel also requested adding screenshots to the user manual for better clarity.

Minutes of Meeting

Title: Intern daily progress update

Date: 01-05-2026

Time: 11:30 PM

Participants:

- Sabareeshwaran
- Samuel
- Sahaya Sherin
- Anto Jeffrin
- Keethana

Agenda

1. Discussion on updates of each tool.

S.No	Action Items	Action Owner	Deadline
1	Convert the user manual to PDF, share the zipped project with documentation, and continue exploring Outlook integration.	Keerthana	04/05/2026
2	User Manual, refer the keerthana's template and update and send the user manual in the mail	Sahaya Sherin	01/05/2026
3	Create a Logs tab to store task completion details (date, person, description, documents) and update the user manual with necessary changes before sharing it with the team.	Anto Jeffrin	01/05/2024

Summary of Discussion

1. MATLAB License Tool

- Sherin presented an update on the tool.
- She demonstrated the option file generation feature.
- She also showcased the user manual prepared so far.
- Sherin mentioned that she will continue working on the template by referring to Keerthana's template.

2. Pool Vehicle Management Tool

- Keerthana presented the User Manual prepared in .md format.
- It was suggested to convert the manual into a document/PDF format for easier sharing and review.
- Keerthana confirmed that the complete project along with the user manual will be zipped and shared with the team.
- Keerthana also mentioned she will research and explore integration of Outlook email functionality into the project.

3. Maintenance Scheduling Tool

- Anto raised a query regarding where to display the task completion details, including completion date (auto-fetched), person performing the task, description, and document upload, since logs are not currently maintained.
- Samuel clarified that a new “Logs” tab should be created to maintain maintenance logs for each tool.
- Anto also presented the user manual prepared for the Maintenance Scheduling Tool, and Samuel asked him to make the necessary changes and then share it with the team.

Minutes of Meeting

Title: Intern daily progress update

Date: 17-04-2026

Time: 11:30 PM

Participants:

- Sabareeshwaran
- Dev
- Samuel
- Sahaya Sherin
- Anto Jeffrin
- Keethana

Agenda

1. Discussion on updates of each tool.

S.No	Action Items	Action Owner	Deadline
1	Share the complete project as a zipped file for review. Explore and implement Outlook-based email functionality.	Keerthana	22/04/2026
2	Complete the option file generation functionality. Implement any additional required features before the deadline.	Sahaya Sherin	27/04/2026
3	Implement task completion details and overdue task handling.	Anto Jeffrin	22/04/2024

Summary of Discussion

1. MATLAB License Tool

Sherin raised queries regarding the option file generation process.

Samuel clarified the approach and suggested:

- Creating a DATA_SH file with 5 columns
- Connecting it with the main/master dataset
- Using the integrated data to generate the option file

A deadline of 27/04/2026 was set for completion.

2. Pool Vehicle Management Tool

- Keerthana presented the finalized project setup, including completion of the .env configuration and overall project implementation.
- The project was reviewed and confirmed to be functionally complete.
- It was suggested to share the complete project as a zipped file for further review and documentation.
- The team also recommended exploring email integration using Outlook for sending notifications and workflows.

3. Maintenance Scheduling Tool

Anto presented the recent updates, which were reviewed and verified by the team.

A query was raised regarding task completion details. Samuel suggested capturing:

- Completion date (auto-fetched)
- Person performing the task
- Description
- Document upload in the synthesis page

It was clarified that overdue tasks should be marked as overdue, while still allowing users to complete them.

Minutes of Meeting

Title: Intern daily progress update

Date: 08-04-2026

Time: 11:30 PM

Participants:

- Sabareeshwaran
- Dev
- Nikitha
- Sahaya Sherin
- Anto Jeffrin
- Keethana

Agenda

1. Discussion on updates of each tool.

S.No	Action Items	Action Owner	Deadline
1	Prepare the project for final completion by organizing .env configuration and all remaining deployment requirements.	Keerthana	15/04/2026
2	Implement the discussed changes and updates in the system.	Sahaya Sherin	20/04/2026
3	Implement the discussed changes and updates in the system.	Anto Jeffrin	15/04/2024

Summary of Discussion

1. MATLAB License Tool

- Discussed and clarified doubts regarding the option file and additional feature implementation.
- Reviewed the process for:

1. Uploading the Excel file for employee details.

2. Reporting and generating the updated Excel file.

- Updates & Notes:
 1. The updated version and submission of Version 1 will be completed before April 20th.
 2. The delay is due to practical sessions and internal examinations.

2. Pool Vehicle Management Tool

- **Keerthana** presented the updated features completed in the tool.
- The Admin Calendar view issue was resolved, and the frontend and backend integration is now fully aligned.
- The email functionality for approval and rejection notifications was completed using Gmail and successfully demonstrated.
- Sabari advised proceeding with the final completion stage of the project, including environment setup and remaining deployment requirements.

3. Maintenance Scheduling Tool

- **Sabareeshwaran** explained the corrections required for Version 1 of the tool.
- The following improvements were suggested:
 - e. Incorporate a calendar view in the scheduling window.
 - f. Allow users to modify the auto-calculated maintenance date through the calendar.
 - g. Ensure the task description is clearly visible.
 - h. Display important task details on hover for better usability.

Minutes of Meeting

Title: Intern daily progress update

Date: 08-04-2026

Time: 11:30 PM

Participants:

- Samuel
- Sabareeshwaran
- Dev
- Sahaya Sherin
- Anto Jeffrin
- Keethana

Agenda

1. Discussion on updates of each tool.

S.No	Action Items	Action Owner
1	● Implement user-specific calendar view enhancements for booking status display. ● Set up test email accounts and develop approval/rejection email functionality.	Keerthana
2	Complete the pending work, zip the project folder, and share it by tomorrow.	Sahaya Sherin
3	● Share the zipped project files of the Maintenance Scheduling Tool for review. ● Prepare the release notes and PPT for the developed tools	Anto Jeffrin

Summary of Discussion

1. Pool Vehicle Management Tool

- **Keerthana** presented the updated calendar view in the user page, showing each user's booking details and status.

- The implementation was reviewed and discussed with the team.
- **Keerthana** raised a query regarding email functionality for booking approvals and rejections.
- It was suggested to create two test email accounts and proceed with implementing the email workflow for approval and rejection notifications.

2. MATLAB License Tool

Sherin presented updates on the MATLAB License Management Tool. She highlighted the current issues related to data synchronization in the Single File Upload feature and raised questions regarding the option file and the license quantity Excel.

3. Maintenance Scheduling Tool:

- **Anto** explained the recent changes made in the Maintenance Scheduling Tool.
- He raised a query regarding the handling of overdue tasks; Samuel mentioned that clarification will be provided after discussing it with the client.
- **Anto** was instructed to share the zipped project files of the Maintenance Scheduling Tool for review.

General Points Discussed

- Preparation of Release Notes (Final Version).
- Creation of a PPT presentation for the project.
- Documentation of:
 - Functionality of the tool
 - Working process/flow
 - Complete project documentation

Minutes of Meeting

Title: Intern daily progress update

Date: 06-04-2026

Time: 11:30 PM

Participants:

- Samuel
- Sabareeshwaran
- Dev
- Sahaya Sherin
- Anto Jeffrin
- Keethana

Agenda

1. Discussion on updates of each tool.

S.No	Action Items	Action Owner
1	Enhance booking UI with calendar view for users and finalize slot-based availability and hover details.	Keerthana
2	• Share the complete project as a zipped folder. • Continue development of the Single File Upload feature.	Sahaya Sherin
3	Implement the suggested improvements in the Maintenance Scheduling Tool and complete the pending functionalities of the ProCalc Extraction Tool and share zip file of ProCalc Extraction Tool	Anto Jeffrin

Summary of Discussion

1. Pool Vehicle Management Tool

- **Keerthana** presented updates to the booking interface, including the addition of a Full-Day slot along with Morning and Evening slots.
- The system now includes dynamic slot handling, showing availability status based on existing bookings.
- A hover-based UI improvement was introduced to display user names and booked time ranges for partially booked slots.
- On the admin side, the calendar hover now shows detailed booking information for better clarity.
- It was suggested to add a calendar view in the user page, where each user can view their own booking history in calendar format upon login.

2. MATLAB License Tool

- **Sherin** presented the latest updates on the MATLAB License Management Tool.

Key updates included:

- Progress on the User Management Module
- Implementation status of Single File Upload
- Dynamic data synchronization between tool, database, and Excel

Clarifications were raised regarding:

- Python implementation for option file generation and folder selection
- Handling sequential file naming

3. Maintenance Scheduling Tool

- Anto presented the initial development version of the Maintenance Scheduling Tool.
- The team reviewed the tool and suggested the following improvements:
 - Display all tasks for the selected duration and enable the Complete button only for tasks scheduled for the current day.
 - Mark overdue tasks as completed by default for now (pending clarification from the client).

4. ProCalc Extraction Tool

- Samuel instructed Anto to complete the remaining pending functionalities and share the zipped project files as soon as possible.

Minutes of Meeting

Title: Intern daily progress update

Date: 01-04-2026

Time: 4:00 PM

Participants:

- Samuel
- Sabareeshwaran
- Dev
- Sahaya Sherin
- Anto Jeffrin
- Keethana

Agenda

1. Discussion on updates of each tool.

S.No	Action Items	Action Owner
1	Continue feature enhancements and implement email notification functionality (Outlook integration) in parallel.	Keerthana
2	Implement the remaining functionalities.	Sahaya Sherin
3	Fix the bugs in applying filters to the downloaded Excel file and continue parallel development of the Maintenance Scheduling Tool.	Anto Jeffrin

Summary of Discussion

1. ProCalc Extraction Tool

- **Anto** presented two improvements made in the tool:

1. The member name dropdown is now dynamically filtered based on the selected skill team and project, ensuring that only relevant members are listed.
 2. The same filters applied in the application are being carried over to the downloaded Excel file. While this functionality is implemented, some issues still persist, and Anto mentioned that he is currently working on fixing them.
- The team reviewed the updates.
 - **Samuel** instructed Anto to continue working on the Maintenance Scheduling Tool in parallel with the ongoing improvements.

2. MATLAB License Tool

- **Sherin** presented updates on the tool, including:
 - a. License deletion functionality
 - b. User removal functionality
- Option file-related doubts and clarifications were addressed by **Sabareeshwaran**.
- Employee details removal and display of employee details were clarified by **Samuel**.
- Delete button display issues were discussed.
- License quantity Excel-related doubts were clarified by **Sabareeshwaran**.

3. Pool Vehicle Management Tool

- **Keerthana** presented the latest updates and changes implemented in the tool.
 - A. The label “My Request” was updated to “Calendar Booking” for improved clarity.
 - B. The Fleet View page was removed from the user side and retained only in the admin dashboard.
 - C. The following feature enhancements were demonstrated:
 - D. Cancel Service option to allow cancellation of scheduled vehicle maintenance
 - E. Automatic maintenance record creation, where admins are notified and only required to fill remaining details
- The updates were reviewed and discussed by the team.
- **Samuel** and **Sabareeshwaran** suggested continuing work on the current features and parallel development of an email notification system, particularly exploring integration with Outlook mail services.

Minutes of Meeting

Title: Intern daily progress update

Date: 30-03-2026

Time: 11:30 AM

Participants:

- Samuel
- Joshva
- Sahaya Sherin
- Anto Jeffrin
- Keethana

Agenda

1. Discussion on updates of each tool.

S.No	Action Items	Action Owner
1	• Update the maintenance module to auto-fill key fields, remove maintenance type, and add admin notification logic. • Rename “Book a Vehicle” to “Calendar Booking” and finalize UI updates.	Keerthana
2	Implement the suggested changes and update the MATLAB License Tool accordingly.	Sahaya Sherin
3	• Implement project-based filtering so that only members from the selected project appear in the member filter. • Complete all pending functionalities of the tool by the end of the week.	Anto Jeffrin

Summary of Discussion

1. Pool Vehicle Management Tool

Keerthana presented the updates to the Maintenance Screen, including the “Add Maintenance Record” form.

- The screen allows entry of vehicle details, service information, cost, workshop details, and notes for maintenance tracking.
- It was discussed that certain fields such as Vehicle Registration, Vehicle Name, and Service

Date should be auto-filled based on system data.

- The Maintenance Type field should be removed, as it is not required.
- The remaining fields (such as notes and additional details) should be filled manually by the admin.
- The system should notify the admin to complete required details when maintenance records are created.
- The Service Date should remain flexible and editable.
- It was suggested that when the service date is approaching or on the due date, the system should appropriately highlight or notify.
- Keerthana also presented the updated label change from “My Booking” to “Book a Vehicle”.
- **Samuel** suggested renaming it to “Calendar Booking” for better clarity.

2. MatLab License Tool

- **Sherin** presented updates on the tool, including the new license upload feature designed to handle large datasets, as well as improvements in sorting row entries based on license options. She also shared updates related to the first-page composite key (Master License + Group Server License).
- **Samuel** suggested hardcoding standardized spellings for options and product names, and also recommended continuing work on the remaining functionalities.
- Regarding the option file, it was proposed that clicking on it should open a new tab where the admin can edit and download the file.

3. ProCalc Extraction Tool

- **Anto** demonstrated the recent updates made to the tool, including the addition of a member-based filter with both text search and dropdown options in the tables.
- **Samuel** reviewed the functionality and requested an enhancement to ensure that only members belonging to the selected project are displayed in the member filter.
- He also instructed Anto to complete the remaining pending tasks, including adding the applied table filters to the downloaded Excel file, by the end of this week.

Minutes of Meeting

Title: Intern daily progress update

Date: 27-03-2026

Time: 11:30 AM

Participants:

- Sabareeshwaran
- Samuel
- Joshva
- Hareesh
- Nikitha
- Sahaya Sherin
- Anto Jeffrin
- Keethana

Agenda

1. Discussion on updates of each tool.

S.No	Action Items	Action Owner
1	Implement the discussed UI enhancements, booking logic updates, and fleet management features in the Pool Vehicle Management Tool.	Keerthana
2	• implement the suggested changes and update the MATLAB License Tool accordingly. • Share the updated tool as a zipped file before 3 PM for review.	Sahaya Sherin
3	• Revise the PRD and include the application flowchart for the Maintenance Scheduling Tool. • Implement filter retention, add member name filtering, and complete all ProCalc changes by 30/03/2026.	Anto Jeffrin

Summary of Discussion

1. Pool Vehicle Management Tool

- Keerthana presented the updated UI for the Employee Search feature in the User Dashboard.
- The combined booking system integrating both slot-based and time-based booking was demonstrated.
 - Additional UI enhancements and feature updates were suggested by the team, including:
 - Adding toggle functionality to cancel upcoming vehicle service schedules
 - Providing a description input field for specifying the reason related to booking/service actions
 - Enabling download of complete fleet maintenance history
 - Allowing users to pre-book vehicles for future dates even if the vehicle is currently under maintenance
 - Updating the calendar hover details to display only user name and booking time slots, including multiple bookings on the same day
 - Restricting the calendar view to working days only (excluding weekends)
- It was suggested to replace the label “My Booking” with a more user-friendly and appropriate term in the UI.
- A calendar-based overview of all vehicle bookings should be available on the user page to improve visibility, coordination, and availability tracking.

2. MatLab License Tool

- **Sherin** presented the update on the new entry feature of the MATLAB License Tool.
- The workflow was explained and demonstrated during the session.
- All queries were addressed, and suggestions were noted for further improvements.

3. Maintenance Scheduling Tool

- **Anto** presented the Project Requirement Document (PRD) for the Maintenance Scheduling Tool.
- The team reviewed the document and provided feedback and suggested improvements.
- Anto was requested to revise the PRD incorporating the suggested changes.
- It was also suggested to include an application flowchart for better clarity.

4. ProCalc Extraction Tool

- The tool was reviewed by the team, and feedback was provided.
- It was suggested that the downloaded Excel file should retain the filters applied in the Members table.
- An additional filter based on Member Names should be implemented in both dashboards.
- A deadline of 30/03/2026 was set to complete the requested changes.

Minutes of Meeting

Title: Intern daily progress update

Date: 25-03-2026

Time: 11:30 AM

Participants:

- Sabareeshwaran
- Samuel
- Joshva
- Sahaya Sherin
- Anto Jeffrin
- Keethana

Agenda

1. Discussion on updates of each tool.

S.No	Action Items	Action Owner
1	Enhance the booking module to include both time slot and session-based (afternoon/evening) selection options.	Keerthana
2	Complete all pending functionalities of the tool. Prioritize implementation of the Excel upload feature.	Sahaya Sherin
3	Prepare Project Requirement Document	Anto Jeffrin

Summary of Discussion

1. Pool Vehicle Management Tool

- **Keerthana** presented the updates implemented from the previous meeting, including the hover feature for booking.
- The implementation was reviewed and discussed with the team.
- **Samuel** suggested enhancing the booking feature by including both specific time slots and broader session options (afternoon/evening).

2. MatLab License Tool

- **Sherin** presented updates on her tool.
- She explained the Edit option and its functionalities.
- **Samuel** suggested not including Grant and Revoke Access within the Master Table Edit option.
- She was advised to focus on completing the remaining functionalities, especially the Excel sheet upload feature.

3. New Tool

- **Anto** was briefed on the requirements of a new tool.
- The tool is intended to display maintenance information of components collectively across different categories such as Test Beds, Chassis Dyno, and other common facilities.
- **Anto** was instructed to begin preparing the Project Requirement Document (PRD) for the same.

Minutes of Meeting

Title: Intern daily progress update

Date: 24-03-2026

Time: 11:30 AM

Participants:

- Sahaya Sherin S
- Anand
- Samuel
- Anto Jefrrin
- Keethana
- Nikitha
- Joshva

Agenda

1. Discussion on updates of each tool.

S.No	Action Items	Action Owner
1	Implement and validate a time-based vehicle booking system with start and end time selection, including UI updates and conflict handling.	Keerthana
2	Work on other functions and implementation	Sahaya Sherin

Summary of Discussion

1. Pool Vehicle Management Tool

Keerthana presented the updates discussed in the previous meeting based on inputs from **Samuel**.

- The key enhancement focuses on improving the vehicle booking system.
- It was proposed that the booking should be time-based, allowing users to:
- Select a start time (when they want to book the vehicle)

- Select an end time (when they will return the vehicle)
- The system should validate and manage bookings within the selected time range, ensuring proper allocation and avoiding conflicts.
- This change is considered essential to improve accuracy, flexibility, and real-time usability of the tool.

2. MATLAB License Tool

- **Sherin** presented the updates on the tool. Samuel asked to work further on the implementation and
- function of the tool. She also cleared her doubts regarding the removal of the user and the updates in
- master table , excel and in the database.

Minutes of Meeting

Title: Intern daily progress update

Date: 20-03-2026

Time: 11:30 AM

Participants:

- Samuel
- Anto Jeffrin
- S. Sahaya Sherin

Agenda

1. Discussion on updates of each tool.

Action Items

S.No	Action Items	Action Owner
1	Work on the mentioned changes about the folder structure. Aslo the splash screen	Sahaya Sherin

Summary of Discussion

Keerthana and **Anto Jeffrin** will be given the requirements of their new project once it has been verified.

MATLAB License Tool

Samuel Anna explained about the change in the folder structure of the project and also about the splash screen addition before the first page. And addition of new features about the project will be discussed on Monday.

Minutes of Meeting

Title: Intern daily progress update

Date: 19-03-2026

Time: 11:30 AM

Participants:

- Samuel
- Sabareeshwaran
- Johua
- Nikitha
- Hareesh
- Anto Jeffrin
- Keerthana
- S. Sahaya Sherin

Agenda

1. Discussion on updates of each tool.

Action Items

S.No	Action Items	Action Owner
1	· Package the tool and share the ZIP file via email · Include architecture diagram and project documentation · Continue implementing remaining functionalities · Enhance and upgrade the tool · Prepare the tool for final review and deployment readiness	Sahaya Sherin
2	Share the updated project ZIP file via email for review and feedback.	Keerthana

3	-Zip and share the complete files of the Meeting Room Management Tool with the team. Prepare documents covering the Application Development Process, Key Achievements of the Tool, and Added Values and Skills.	Anto Jeffrin G
4	Work on the suggested changes in the meeting room tool	Anto Jeffrin, Sahaya Sherin

Summary of Discussion

1. ProCalc Extraction Tool

- The team reviewed the latest updates and provided feedback.
- **Samuel** informed that the tool is currently under deployment, and any required changes will be communicated to **Anto**.
- **Anto** was requested to share the zipped project files with the team for further processing.

2. Pool Vehicle Management Tool

- **Keerthana** presented the latest updates on the Vehicle Service Management feature, including the automation of the service management cycle.
- The implementation was demonstrated for both the Admin side and User side functionalities.
- The updates were reviewed by the team during the meeting
- It was suggested that the project files be shared as a ZIP via email for further verification. · The team will review the implementation and provide feedback or required modifications, if any.

3. MATLAB License Tool

- **Sherin** presented the latest updates on the MATLAB License Management Tool. · A live demo was conducted showcasing the Grant Access and Revoke Access functionalities. · The Data Page implementation was demonstrated, including:
 - Display of the Master Table
 - Table functionalities such as edit, delete, refresh, import, and re-import
- A clarification was raised regarding the relationship between the License Quantity Excel and the Main Data Excel.
- **Sabareeshwaran** and **Samuel** addressed the queries and provided clarification.

4. Meeting Room Management Tool

- Samuel** asked for updates on the Meeting Room Management Tool, and **Anto** presented the latest

changes implemented:

- Renamed “Amenities” to “Facilities”.
- Added auto-refresh functionality to refresh the bookings page every 30 seconds.
- Updated the Total Hours Booked Today bar to reflect the total hours based on the selected date in the date picker.
- Verified the functionality of the toggle buttons between Upcoming and Past meetings.
- Implemented a booking details tooltip that displays information on hovering over a booking.
- Improved the application’s responsiveness.

Minutes of Meeting

Title: Intern daily progress update

Date: 12-03-2026

Time: 11:30 AM

Participants:

- Samuel
- Sabareeshwaran
- Arvind
- Johua
- Anto Jeffrin
- Keerthana
- S. Sahaya Sherin

Agenda

1. Discussion on updates of each tool.

Action Items

S.No	Action Items	Action Owner
1	Implemented vehicle usage duration and maintenance date calculation.	Keerthana
2	Flow chart of the entire tool and the tool development	Sahaya Sherin
3	Work on the frontend of the dashboard pages	Anto Jeffrin
4	Work on the suggested changes in the meeting room tool	Anto Jeffrin, Sahaya Sherin

Summary of Discussion

1. ProCalc Extraction Tool

- **Anto** displayed the recent updates made to the tool, including improvements in the UI of the tables and the addition of a Skill Team column in the Members table.

- **Samuel** reviewed the changes and instructed Anto to complete the remaining development and share the zipped code of the tool before Saturday for internal testing.

2. Pool Vehicle Management Tool

- **Keerthana** presented the updates implemented based on the previous meeting.
- The work-in-progress vehicle service feature was also demonstrated.
- Sabareswaran suggested adding flexibility for admins to define vehicle usage duration in the Admin Dashboard under Vehicle Manager.
- The maintenance date will be displayed in the vehicle table in the admin dashboard.
- Notification functionality will be handled later; the current focus is on data entry, calculation, and display.

3. MATLAB License Tool

- Sherin explained the flowchart of the tool in detail.
- She clarified her doubts regarding the main data Excel file.
- The clarification was done with Samuel.

Minutes of Meeting

Title: Intern daily progress update

Date: 11-03-2026

Time: 4:30 PM

Participants:

- Samuel
- Sabareeshwaran
- Johua
- Anto Jeffrin
- Keerthana
- S. Sahaya Sherin

Agenda

1. Discussion on updates of each tool.

Action Items

S.No	Action Items	Action Owner
1	Implement the discussed UI updates and booking visibility logic for vehicle service schedules in the Pool Vehicle Management Tool.	Keerthana
2	Work on the suggested updates.	Sahaya Sherin
3	Work on the frontend of the dashboard pages	Anto Jeffrin
4	Work on the suggested changes in the meeting room tool	Anto Jeffrin, Sahaya Sherin

Summary of Discussion

1. ProCalc Extraction Tool

- **Anto** presented four additional visualization options to the team and requested feedback on whether they should be included in the tool. The visualizations shown were:
 1. Monthly trends of Cost and Hours
 2. Team Contributions
 3. Top Performers
 4. Cost and Hours vs Employees
- After reviewing them, **Samuel** mentioned that the existing visualizations already implemented in the tool were sufficient and convincing.
- He suggested keeping the current visualizations as the default view, while providing an option to access the newly proposed visualizations if required.
- **Anto** was also advised to continue the UI development and complete it as soon as possible.

2. Pool Vehicle Management Tool

- **Keerthana** presented the latest updates made to the tool, including both UI changes and newly implemented functionalities.
- In the Admin Dashboard – Employee Details section, it was suggested that the department selection should be implemented as a dropdown menu instead of the existing button-based layout.
- **Keerthana** raised a query regarding booking visibility for past dates and future months.
- **Sabri** suggested that past and future months should remain visible in the calendar view, but employees should not be allowed to make bookings for those dates.
- It was also discussed that vehicle service schedules should be visible in advance, including the time and duration when the vehicle will be under maintenance.
- This visibility will allow users to see in advance when a vehicle will be unavailable due to service, preventing bookings during that period.

3. MATLAB License Tool

- **Sherin** presented her work on converting the React frontend to a PyQt frontend. The changes made so far were demonstrated, and further suggestions were discussed.
- **Sabareshwaran** suggested the following improvements:
 2. The upload option for the main data should be placed on the main UI page.
 3. After the data is updated, there should be an option to download the updated main data as an Excel file.
 4. Add two buttons on the main UI page:
 - F. Designated License
 - G. Add Individual License

Minutes of Meeting

Title: Intern daily progress update

Date: 10-03-2026

Time: 11:30 PM

Participants:

- Samuel
- Sabareeshwaran
- Arvind
- Johua
- Anto Jeffrin
- Keerthana
- S. Sahaya Sherin

Agenda

1. Discussion on updates of each tool.

Action Items

S.No	Action Items	Action Owner
1	Implement the discussed admin dashboard updates, maintenance visibility logic, and Excel download functionality in the Pool Vehicle Management Tool.	Keerthana
2	Prepare the flow chart and work on the updates and suggestions	Sahaya Sherin
3	Work on the frontend of the dashboard pages	Anto Jeffrin
4	Work on the suggested changes in the meeting room tool	Anto Jeffrin, Sahaya Sherin

Summary of Discussion

1. ProCalc Extraction Tool

- **Samuel** asked **Anto** to provide a complete end-to-end demo of the current ProCalc Extraction Tool to **Arvind** and he demonstrated the tool and explained the current implementation.
- After reviewing the demo, **Arvind** suggested two improvements:
 1. Add a Skill Teams column in the Members table, positioned between the Members and Rate columns, to easily identify the team of each member.
 2. Add a filter based on the Project Manager's name.
- Since the current sample dataset does not contain Project Manager details, **Samuel** and **Arvind** mentioned that they will confirm the requirement with the client and inform **Anto** about the next steps.
- He was instructed to continue development using the template-based logic.
- A deadline was set for this week to complete the entire tool.

2. Pool Vehicle Management Tool

- **Sam** suggested adding a feature in the Admin Dashboard that allows the admin to define the usage duration of each vehicle.
- A prior notification system should be implemented to alert the admin when the vehicle maintenance date is approaching.
- When a vehicle is under maintenance, it should still be visible in the user interface, but users should not be able to select or book the vehicle.
- The UI should display the expected maintenance duration of the vehicle to inform users about its availability.
- **Keerthana** raised a query regarding the All Bookings page, which already contains approval details in the frontend.
- **Sam** confirmed that no changes are required for the existing All Bookings page, and it can remain as implemented.
- A feature was also discussed to provide an option to download booking details as an Excel sheet for user reference.

3. MATLAB License Tool

- **Sherin** shared her research about the comparison between PyQt5 and PySide bindings, and also explained the advantages and disadvantages of the PyQt5 and PyQt6 libraries.
- **Samuel and Sabareeshwaran** explained the updates and changes in the MATLAB tool, which include:
 - Mapping the group server license to the respective product.
 - The objective of the MATLAB tool is to track and trace license access, mainly focusing on option file generation.
 - The grant and revoke options are applicable only for floating and network named licenses. For designated computer and individual licenses, the system should only display the information in the UI.
- They also suggested preparing the workflow of the project using a flowchart.

Minutes of Meeting

Title: Intern daily progress update

Date: 09-03-2026

Time: 11:30 PM

Participants:

- Samuel
- Sabareeshwaran
- Nikitha
- Anto Jeffrin
- Keerthana
- S. Sahaya Sherin

Agenda

1. Discussion on updates of each tool.

Action Items

S.No	Action Items	Action Owner
1	Continue feature development for the Pool Vehicle Management Tool and document the recent time-slot selection update.	Keerthana
2	Research on the PyQt5 and PyQt6 libraries	Sahaya Sherin
3	Work on the frontend of the dashboard pages	Anto Jeffrin
4	Work on the suggested changes in the meeting room tool	Anto Jeffrin, Sahaya Sherin

Summary of Discussion

1. ProCalc Extraction Tool

- **Anto** walked the team through the recent updates made in the tool, particularly the modified download file logic using the template-based approach.

- The generated Excel download now contains:
 1. An unmodified raw data sheet
 2. A hidden sheet (pivot_calc) used for calculations
 3. Members dashboard
 4. Skill Teams dashboard
- The dashboards currently use slicers for filtering data and are implemented using the xlwings library.
- xlwings works only on Windows and Mac and requires opening Excel, loading the template, writing data, saving the file, and closing Excel for each download request. This could slow down the server or cause crashes if many users access it simultaneously.
- As an alternative, openpyxl can be used since it does not require opening Excel and would avoid server performance issues. However, openpyxl does not support slicers, meaning slicers would be removed and only basic filters could be used.
- **Samuel** asked Anto to zip the code and share it, so he can review it and discuss the approach with **Arvind**, after which further direction will be provided.

Frontend Update:

- The UI of the upload page has been updated to follow the AVL theme.

2. Pool Vehicle Management Tool

- **Keerthana** demonstrated the updates made based on the feedback from the previous meeting.
- The system has been modified so that after selecting the date, users can directly select available time slots, instead of selecting from a numerical time range. The change was reviewed and confirmed during the meeting.
- **Keerthana** raised a clarification regarding whether users should be allowed to select random dates or only dates within a specific range.

3. MATLAB License Tool

- **Sherin** presented her research based on the different python libraries and frameworks for the UI development. She shared her document on the comparison of the libraries .
- **Sabareeshwaran & Samuel** explained about the need of exe file. And also suggested about the PyQT5 and PyQT6 libraries.

Minutes of Meeting

Title: Intern daily progress update

Date: 04-03-2026

Time: 11:30 PM

Participants:

- Samuel
- Sabareeshwaran
- Arvind
- Joshua
- Anto Jeffrin
- Keerthana
- S. Sahaya Sherin

Agenda

1. Discussion on updates of each tool.

Action Items

S.No	Action Items	Action Owner
1	Enable manual booking time range and update UI.	Keerthana
2	Restructure Excel with multiple sheets and separate main data sheet.	Sahaya Sherin
3	Implement template-based logic for pivot tables/charts	Anto Jeffrin
4	Fix tooltip, responsiveness, and scroll issues.	Anto Jeffrin, Sahaya Sherin

Summary of Discussion

1. ProCalc Extraction Tool

- **Anto** informed the team that he is currently working on implementing the template-based logic that was discussed in the previous meeting. He mentioned that he will notify the team once the implementation is completed.

- Since **Arvind** was absent in the previous meeting, **Samuel** asked Anto to explain the template logic to him.
- **Anto** explained the proposed template approach and also presented the template Excel file to the team for review.
- **Arvind** asked **Anto** for a timeline to complete this functionality. As previously decided, the team confirmed Thursday as the deadline for completing the implementation.

2. Pool Vehicle Management Tool

- **Keerthana** demonstrated the functional website of the Pool Vehicle Management System, which is currently focused on implementing core functionalities.
- The team reviewed the functionalities and suggested a few improvements:
 1. The booking time range should be manually entered by the user based on their preferred time duration.
 2. Minor UI adjustments were suggested.

3. MATLAB License Tool

- **Sherin** demonstrated the functionalities of the first page of the MATLAB License Management Tool.
- She showed a demo of dynamic updates between the Excel sheet and the database.
- She also demonstrated the granting and revoking of license access.
- After reviewing the implementation, the team suggested the following changes:
 - H. Maintain a single Excel file with multiple sheets for:
 1. License availability
 2. Employee details
 3. Group server license details
 - I. Maintain a separate Excel sheet for the main data.

4. Meeting Room Management Tool

- The team reviewed the tool and suggested the following corrections:
 - The tooltip displaying booking details when hovering over a booking is not appearing and needs to be fixed.
 - The team advised that existing functionalities should not be removed without prior communication.
 - The application currently has responsiveness issues, and the scroll functionality is not working properly. These issues need to be resolved.

Minutes of Meeting

Title: Intern daily progress update

Date: 02-03-2026

Time: 11:30 PM

Participants:

- Samuel
- Sabareeshwaran
- Anto Jeffrin
- Keerthana
- S. Sahaya Sherin

Agenda

1. Discussion on updates of each tool.

Action Items

S.No	Action Items	Action Owner
1	Change the input file format to excel and begin with frontend development.	Keerthana
2	Continue with the development of the tool.	Sahaya Sherin
3	Implement the new download logic	Anto Jeffrin

Summary of Discussion

1. Pool Vehicle Management Tool

- **Keerthana** demonstrated the implemented login authentication module, the backend development of the booking side, and the API handling logic.
- The implementation was reviewed and verified by the team.
- She also presented the planned UI template of the tool designed using draw.io.
- **Sabareeshwaran** reviewed the UI and approved it with a minor suggestion to change the file input format from .csv to an Excel sheet format.

2. MATLAB License Tool

- **Sherin** shared the recent updates on the MATLAB License Management Tool project. She presented the created database structure and demonstrated the frontend development of the first page.

- She also clarified her queries related to the Designated Computer License type to ensure proper implementation within the tool.

3. ProCalc Extraction Tool

A. Backend Structuring Update

- **Anto** mentioned that he had shared the updated backend folder structure of the Meeting Room Management Tool with the team for review.
- **Samuel** mentioned that he will review the updated folder structure and inform if any corrections or improvements are required.
- Once the updated structure is finalized and approved, the same structure will be adopted for the ProCalc Extraction Tool as well.

B. Update in Output File – Visualizations Enhancement

- The output Excel file has been updated with the correct data and required visualizations.
- However, the current visualizations are static and do not update dynamically when filters are changed in the sheet.

To address this limitation:

- **Anto** proposed creating Pivot Tables and Pivot Charts with slicers to enable dynamic filtering.
- It was noted that implementing pivot tables and slicers directly through backend logic is not feasible, as existing Python libraries do not fully support this functionality.
- As an alternative solution:
 1. Creating a manual Excel template with predefined pivot tables, pivot charts, and slicers (based on the fixed input structure).
 2. Using this template in the backend so that only the dataset is replaced when new data is uploaded.
- This approach would allow dynamic pivot-based visualizations without relying entirely on backend-generated logic.
- **Samuel** advised maintaining a copy of the previous backend approach and proceeding with implementing the proposed template-based solution.
- He also mentioned that he would verify the feasibility of this approach with **Arvind** and update accordingly.

Deadline

A deadline has been set for Thursday to complete the pending tasks of all the tools.

Minutes of Meeting

Title: Intern daily progress update

Date: 27-02-2026

Time: 11:30 PM

Participants:

- Samuel
- Sabareeshwaran
- Joshua
- Keerthana
- S. Sahaya Sherin

Agenda

1. Discussion on updates of each tool.

Action Items

S.No	Action Items	Action Owner
1	Work on preparing the required Excel sheets and begin the tool development.	Sahaya Sherin
2	Finalize the database schema and proceed with the backend and full development of the Pool Vehicle Management Tool.	Keerthana

Summary of Discussion

1. Pool Vehicle Management Tool

- **Keerthana** presented the proposed database schema for the Pool Vehicle Management Tool.
- She raised a few queries regarding the selection of appropriate primary keys.
- **Sabareeshwaran** clarified the doubts and provided guidance on structuring the schema correctly.
- He advised proceeding with the backend implementation and continuing with the full system development.

2. MATLAB License Tool

- **Sherin** presented the overall project workflow for the MATLAB License Tool.
- The team discussed necessary modifications to the Excel sheet structure.
- It was decided to maintain separate Excel sheets for:
 - a. License availability details

- b. User details
- c. Group server license details
- d. Main data sheet

Minutes of Meeting

Title: Intern daily progress update

Date: 26-02-2026

Time: 11:30 PM

Participants:

- Samuel
- Sabareeshwaran
- Arvind
- Joshua
- Nikitha
- Anto Jeffrin
- Keerthana
- S. Sahaya Sherin

Agenda

1. Discussion on updates of each tool.

Action Items

S.No	Action Items	Action Owner
1	• Correct the base url for the meeting room and procalc. • Implement all the updated discussed.	Anto Jeffrin
2	Finalize and update the database based on the discussed workflow.	Keerthana
3	The requirement document and the dummy Excel files are to be completed and submitted.	Sahaya Sherin

Summary of Discussion

1. ProCalc Extraction Tool

—> Anto presented the newly implemented updates in the ProCalc Extraction Tool:

- Metadata from Row 2 of the input Excel file is now extracted and displayed in the frontend dashboard.
- Data parsing logic has been updated to consider records starting from Row 4 onwards.

—> The team reviewed the recent updates made to the tool.

—> Anto raised a clarification regarding supported input file formats.

- Samuel confirmed that the tool should accept .xls, .xlsx, and .xlsm file formats.
- The output file format should match the input format (e.g., if input is .xls, output should also be .xls).

—> Samuel pointed out that the current directory structure maintained for the project is incorrect and instructed Anto to maintain separate folders for:

- Backend
- Frontend

—> Aravind guided Anto in restructuring the project folders as proposed by Samuel.

—> Sabareeshwaran reviewed the .env configuration file and identified issues in how the base URL was declared:

- Currently, only the backend base URL is defined.
- He advised adding a base URL configuration for the frontend as well, which would be beneficial during production deployment.

—> He also highlighted similar structural issues observed in the Meeting Room Management Tool and suggested the following best practices:

- Maintain proper base URLs within the codebase.
- Create a separate script file for database creation and manipulation commands.
- Clearly separate frontend and backend into different folders.
- Maintain a dedicated folder for database files.
- Keep only API request handling logic within the main server file.

—> He instructed him to analyze and clearly define the project structure for both the Meeting Room Management Tool and the ProCalc Tool, and advised the team to follow consistent architectural practices in upcoming tools.

—> Samuel asked Anto to complete the remaining pending functionalities before the next tool assignment:

- Implement filtering options in the output Excel file.
- Add visualization elements within the Excel output.
- Enhance the tool with a structured frontend interface.

2. Pool Vehicle Management Tool

- Keerthana informed the team that she had reworked the database based on the updates discussed in the previous meeting.
- She raised questions regarding table entries and data flow in the database.
- Sabareeshwaran explained the database structure and workflow in detail.
- He also clarified all the doubts related to the database and overall process.

3. MATLAB License Tool

- Sherin informed the team that the creation of the dummy data Excel sheet is underway.
- She also mentioned that the requirement document is currently in progress.

Minutes of Meeting

Title: Intern daily progress update

Date: 25-02-2026

Time: 11:30 PM

Participants:

- Samuel
- Sabareeshwaran
- Arvind
- Anto Jeffrin
- Keerthana
- S. Sahaya Sherin

Agenda

1. Discussion on updates of each tool.

Action Items

S.No	Action Items	Action Owner
1	Implement the discussed updates and in the ProCalc tool.	Anto Jeffrin
2	Implement the discussed updates and start request handling.	Keerthana
3	Prepare the requirement document within friday	Sahaya Sherin

Summary of Discussion

1. ProCalc Extraction Tool

- **Anto** presented the latest updates made to the ProCalc Extraction Tool.
- The issue in the downloaded Excel file was addressed — the first sheet now correctly contains the original uploaded input data without any modifications.
- The updates were reviewed by **Samuel, Sabareeshwaran, and Arvind**.
- **Samuel** provided technical guidance on configuring the application to accept only .xls file formats.
- The team instructed **Anto** to proceed with implementing the remaining functionalities and to begin frontend development.

2. Pool Vehicle Management Tool

- **Keerthana** informed the team that she had collected updates from **Anto** and **Sahaya Sherin** regarding the Meeting Room Management Tool.

- She mentioned that she reviewed their implementation flow.
- She also stated that she had started working on the previously discussed updates from the last meeting.
- She added that she would proceed with implementing the request handling.

3. MATLAB License Tool

- **Sherin** presented the updated requirements for the first page to the team.
- She explained the changes and clarifications using the UI view for better understanding.
- The discussion helped align the team on the expected layout and functionality of the page.

Minutes of Meeting

Title: Intern Requirement Verification

Date: 24-02-2026

Time: 7:30 PM

Participants:

- Nikitha
- Samuel
- Sabareeshwaran
- Anto Jeffrin
- Keerthana
- S. Sahaya Sherin

Agenda

1. Discussion on updates of each tool.
2. Clarifications on MatLab License tool.

Action Items

S.No	Action Items	Action Owner
1	Implement the discussed updates and fixes in the ProCalc tool.	Anto Jeffrin
2	Update the Database based on the proposed updates.	Keerthana
3	Create the requirement document based on the given updates	Sahaya Sherin

Summary of Discussion

1. ProCalc Extraction Tool

- **Anto** provided a walkthrough of the newly implemented changes in the ProCalc Extraction Tool.
- **Samuel** tested the newly added Copy button by copying the table and pasting it into an Excel sheet, and it worked correctly.
- **Sabareeshwaran** and **Samuel** reviewed the Excel file generated using the Download button and suggested the following corrections:
 - The values in the Members table are not in the correct order and need to be arranged properly.

- There is an unnecessary column in the original sheet. The original sheet in the exported file should remain completely unchanged as per the uploaded input.
- They also instructed Anto to proceed with implementing the remaining requested changes.
- Additionally, **Sabareeshwaran** pointed out issues in the README file of the Meeting Room Management Tool and advised that AI should be used only to enhance content clarity, not to build the documentation entirely.

2. Pool Vehicle Management Tool

- **Keerthana** presented the current database design and table structures of the Pool Vehicle Management System.
- She explained that the backend request handling for both User and Admin modules has been completed.
- Based on the presentation, **Sabareeshwaran** reviewed the implementation and suggested:
 - Updates to certain database attributes.
 - Modifications to the UI flow and layout.
- These changes were discussed to ensure better alignment between the data structure, user interface, and overall project workflow.

3. MATLAB License Tool

- **Sherin** clarified her doubts regarding the MATLAB Management Tool with **Sabareeshwaran**.
- She discussed the dynamic updating mechanism between the Excel sheet and the tool.
- Clarifications were sought regarding the group server licensing types, including:
 - Floating License
 - NNU (Named Network User)
 - Designated Computer
 - Individual License
- She also discussed the license file option and configuration details related to the tool's .opt file format.

Minutes of Meeting

Title: Intern Requirement Verification

Date: 18-02-2026

Time: 11:30 AM

Participants:

- Nikitha
- Samuel
- Sabareeshwaran
- Anto Jeffrin
- Keerthana
- Joshua
- S. Sahaya Sherin
- Aravind

Agenda

1. Discussion on project requirements for ongoing intern tools
2. Clarifications on existing tools and workflow updates
3. Assignment of next development tasks

Action Items

S.No	Action Items	Action Owner
1	Implement the discussed updates and fixes in the ProCalc tool.	Anto Jeffrin
2	Update the Pool Vehicle Management System with time-slot functionality Update the Project Requirement Document to reflect the agreed changes	Keerthana
3	Create the database model based on the discussed requirements	Sahaya Sherin

Summary of Discussion Points

1. Initial Discussion

- Samuel discussed the port configuration issue and the null value error in the existing tool with Anto Jeffrin.
- The need to verify and correct the development server port and handle zero/null values properly was highlighted.

2. MATLAB License Management Tool – S. Sahaya Sherin

Sabareeshwaran explained the requirements and workflow of the MATLAB License ManagementTool:

Access Page

The first page will contain functionality to grant or reject access by selecting the user name and user ID.

Main Data Page

- This page will display the complete dataset.
- Explanation was given for all fields and attributes, including:
 - Different license options
 - Group server license structure
 - How licenses are connected and managed

Tool Functionalities

- Add or remove employee access to licenses
- Edit and update data directly in the main dataset page
- Maintain proper workflow for license management

3. Pool Vehicle Management Tool – Keerthana

Samuel suggested updates to improve the booking workflow:

- Time slots will be included while selecting booking slots for more precise scheduling.
- Approval and rejection of booking requests will be handled directly from the Admin page.
- These updates aim to streamline booking flow and improve system control.

4. ProCalc Tool – Anto Jeffrin

Samuel raised key issues and enhancement requirements:

Issues Identified

- Development server port differs from the port defined in the code and must be verified.
- Tool currently fails when dataset contains 0 values; error handling must be improved.

Required Enhancements

- Dataset format reviewed; actual data starts from Row 4, which should be considered for processing.
- Add a common Export button that downloads an Excel file containing:
 - Sheet 1 → Original uploaded dataset
 - Sheet 2 → Output tables, visualizations, and applied filters
- Add a Copy button to copy displayed tables.

- As suggested by Arvind, Row 2 file information must be displayed in the dashboard.
- Database integration is not required at this stage; may be added later if needed.
- Joshua shared the npm command required to change the development server port.

Overall Action Items Summary

1. Design database model for MATLAB License Management Tool
2. Update Pool Vehicle Management Tool with time-slot logic and documentation changes
3. Implement ProCalc tool fixes and enhancements

Minutes of Meeting

Title: Intern Requirement Verification

Date: 11-02-2026

Time:11:30 AM

Participants:

- Samuel Kiruba
- Arvind
- Joshua
- Sabareeshwaran
- Sahaya Sherin
- Anto Jeffrin
- Keerthana

Agenda

1. Status update on all three intern projects.
2. Discussion on doubts, clarifications, and suggested improvements.

Action Items

S.No	Action Items	Action Owner
1	Update the Procalc Extraction Tool with the mentioned changes and begin with the development of User Interface.	Anto Jeffrin
2	Refine the prepared Project Requirement Document with the mentioned updates and prepare a workflow for the Pool Vehicle Management Tool project.	Keerthana
3	Refine the prepared Project Requirement Document with the mentioned updates and prepare a workflow for the Matlab License Tool project.	Sahaya Sherin

Summary of Discussion Points

1. ProCalc Extraction Tool

After reviewing the updated prototype:

- **Sabareeshwaran** reviewed the code structure and instructed to include a .env file in the project directory to store the URL. He also mentioned that confirmation regarding the need for a database will be provided after further discussion.

- **Samuel** suggested adding a scroll feature to the bar graph when the filter is set to “All Members” to prevent congestion and improve visualization clarity.
- **Aravind** recommended including the Euro (€) currency symbol in both the Rate and Total Cost columns for better clarity and consistency.
- It was agreed that once the above modifications are implemented, the UI development phase can be initiated.

2. Pool Vehicle Management Tool

- The Requirement Document was reviewed in detail with **Samuel and Sabareeshwaran**, and key updates were finalized. It was decided that:
 - A booking request must be automatically rejected if any of the selected date slots are already booked.
 - Users can only book upcoming dates; booking for past dates will not be permitted.
- In cases where multiple users request the same dates:
 - The request will be forwarded to the Admin.
 - The Admin will review and approve bookings based on priority and justification.
- A Q&A session was conducted to clarify implementation-related doubts, and the updated requirements were confirmed for clear understanding.

3. MATLAB License Tool

- An overview of the understood requirements was presented.
- The primary objective of the system is to efficiently manage and monitor MATLAB licenses within the organization.
- The discussion included:
 - Clarification of the difference between a Master License and individual licenses.
 - Understanding how different license types function in an industrial environment.
 - The need for a database to store license details, user information, allocation status, and toolbox usage.
- Various license types were discussed, including:
 - Floating Licenses
 - Individual Licenses
 - Designated Computer Licenses
 - Network Named User Licenses
- Their impact on overall system design and allocation logic was also reviewed.

Minutes of Meeting

Title: Intern Individual Task Allocation

Date: 10-02-2026

Time:11:30 AM

Participants:

- Samuel Kiruba
- Arvind
- Joshua
- Sabareeshwaran
- Nikitha
- Sahaya Sherin
- Anto Jeffrin
- Keerthana

Agenda

1. Status update on ProCalc Extraction Tool project
2. Assigning projects to interns

Action Items

S.No	Action Items	Action Owner
1	Update the Procalc Extraction Tool with the mentioned changes	Anto Jeffrin
2	Prepare the Project Requirements Document (PRD) for the Pool Vehicle Management Tool and coordinate with the team for review and approval.	Keerthana
3	Collect, analyze, and document the requirements for the MATLAB License Management Tool.	Sahaya Sherin

Summary of Discussion Points

1. ProCalc Extraction Tool

- **Anto Jeffrin** presented the functional prototype of the **ProCalc Extraction Tool** for review and walkthrough.
- **Sabareeshwaran** provided detailed suggestions focused on enhancing visualization and usability:
 - Make visualizations dynamic, updating automatically when filters are changed.
 - Add X-axis labels (employee names) and data labels to the graphs for better clarity.

- Introduce separate tabs for:
 - Members table and its corresponding visualization
 - Skill teams table and its corresponding visualization
 - Demonstrated manual filtering with live visualization via screen sharing to clearly explain the expected functionality.
 - Requested the addition of year-based filters.
 - Emphasized the importance of strong and meaningful data visualization, urging the team to focus more on this aspect.
- **Aravind** added further suggestions:
 - Allow users to select a specific time period for visualization, ensuring that only the chosen timeframe is displayed.
 - Add a Rate column in the Skill Teams table to display the rate associated with each skill team.

2. Pool Vehicle Management Tool

- **Samuel** proposed several enhancements to the booking module, including adding start and end dates for booking slots, capturing the reason for booking and the type of vehicle requested, displaying complete vehicle details before booking, restricting new vehicle entries to admin only, and introducing an admin approval workflow for booking requests.
- **Sabareeshwaran** suggested improving the user flow and UI by providing dropdown options for booking slots and reasons, consolidating all user booking actions into a single page with clear labels, and creating a separate admin interface to efficiently manage booking approvals and rejections.

3. MATLAB License Tool

- **Samuel** discussed the initial requirements for developing a **MATLAB License Tool** to manage and control user access to licensed MATLAB products.
- The system will allow administrators to filter users using User Name or User ID and display the list of products accessible through available licenses. Based on this information, the administrator can either add new product access or remove existing access for a user.
- All changes in access will be reflected in the database automatically. The initial interaction will begin with a filtering form, followed by options to add or remove access through dedicated forms that collect product and license details.
- The agreed database fields include Master License, License, License Option, Product, User Name, and User ID.

Minutes of Meeting

Title: ProCalc extraction tool - Requirement Gathering

Date: 03-02-2026

Time: 11.30 AM

Participants:

- Samuel Kiruba
- Arvind
- Joshua
- Sabareeshwaran
- Muthu Rama Lingam
- Sahaya Sherin
- Anto Jeffrin

Agenda

1. Status update on ProCalc Extraction Tool project

Action Items

No	Action Items	Action Owner
1	Prepare the Project Requirements Document (PRD) for the ProCalc Extraction Tool and get reviewed by the team.	Sahaya Sherin, Anto Jeffrin

Summary of Discussion

- **Sabareeshwaran** informed that, after confirmation, each intern will work on two projects, enabling completion of the overall four-project requirement. He also mentioned that the completed Meeting Room Management Tool can be tested and further processed for deployment.

- **Aravind, Samuel, and Sabareeshwaran** explained the client-gathered requirements for the ProCalc Extraction Tool. They clarified all major points and ensured that the interns had a clear understanding of the project scope and expectations.
- **Sabareeshwaran** provided guidance on fixing realistic and achievable deadlines, emphasizing the importance of proper planning and time management.

Minutes of Meeting

Title: Intern Progress Update

Date: 29-01-2026

Time: 11.00 AM

Participants:

- Samuel Kiruba
- Praveen Mahendran
- Joshua
- Sabareeshwaran
- Muthu Rama Lingam
- Anto Jeffrin
- Sahaya Sherin

Agenda

1. Status update on ProCalc Extraction Tool project
2. Discussion on requirement clarification for ProCalc project
3. Review and demo of Meeting Room Management Tool project
4. Technical suggestions and best practices

Action Items

No	Action Items	Action Owner
1	Complete the Meeting room Management Tool Project.	Sahaya Sherin, Anto Jeffrin

Summary of Discussion

- **Samuel** enquired about the progress on the ProCalc Extraction Tool project.
- The interns informed that they require further clarification on the project requirements before proceeding.
- **Praveen** mentioned that Samuel and the team will gather and provide clear requirements

for the ProCalc Extraction Tool project by Monday. He instructed the interns to complete the Meeting Room Management Tool project before Monday and emphasized that the ProCalc project should be given high priority once requirements are shared.

- He also requested a quick demo of the Meeting Room Management Tool, which was presented by the interns.
- **Sabareeshwaran** suggested technical improvements and best practices:
 - Use environment variables to store IP addresses.
 - Prefer using Flask over FastAPI for upcoming projects.

Minutes of Meeting

Title: Discussion on ProCalc Extraction Tool Requirements.

Date: 28-01-2026

Time: 11.30 AM

Participants:

- Samuel Kiruba
- Praveen Mahendran
- Joshua
- Sabareeshwaran
- Aravind Kumar
- Anto Jeffrin
- Sahaya Sherin

Agenda

1. Understanding the ProCalc tool
2. Project requirements discussion
3. Review of Meeting Room Management tool updates
4. Next steps and action items

Action Items

No	Action Items	Action Owner
1	Work on the UI of the Meeting Room Management tool.	S Sahaya Sherin, Anto Jeffrin G
2	Gather and document requirements for the ProCalc extraction tool.	S Sahaya Sherin, Anto Jeffrin G

Summary of Discussion

- **Praveen** : Explained what the ProCalc tool is and its purpose. Informed interns to report to the office every Wednesday for meetings.

- **Aravind** : Explained the project and its requirements in detail. Clarified all doubts and provided a clear understanding of the project scope and expectations.
- **Samuel Kiruba**: Added further explanation regarding the ProCalc tool and its usage.
- **Sabareeshwaran**: Asked for updates on the Meeting Room Management tool. The team demonstrated the recent improvements and changes made based on suggestions from the previous meeting. Instructed the team to gather requirements for the ProCalc project and parallelly continue UI development for the Meeting Room Management tool.

Minutes of Meeting

Title: Meeting Room Management Tool - Project Update

Date: 01/27/2026

Time: 11:30 AM

Participants:

- Sabareeshwaran
- Samuel Kiruba
- Joshua Alwinking
- Muthu Rama Lingam
- Jayaprathap
- Padigapati Venkata Nikitha
- Naveen Kumar
- Anto Jeffrin G

Agenda:

1. Presentation of Prototype – Version 1 of the Meeting Room Management Tool
2. Suggestions, Feedback, and Improvement Discussions

Action Items:

No	Action Items	Action Owner
1	Incorporate all suggested improvements and modifications into the prototype	S Sahaya Sherin, Anto Jeffrin G
2	Update the UI to follow the standard AVL theme and design guidelines.	S Sahaya Sherin, Anto Jeffrin G

Summary of Discussion points:

- **Anto Jeffrin** provided a demonstration of Prototype – Version 1 of the Meeting Room Management Tool and explained the functionalities implemented so far.
- **Sabareeshwaran** shared the following suggestions and improvements:
 - Add new tabs and modify the listing approach for Rooms, Teams, and Employees in the Admin page.
 - Move the Download Weekly Report option to the Admin page.
 - Update the UI to follow the standard AVL template and theme.
- **Samuel** raised a scenario-based clarification: If a meeting has already been booked and later the details of the employee who booked the meeting are modified in the Admin panel, the system behavior should be verified and handled appropriately.

Minutes of Meeting

Title: Requirement Gathering - Meeting Room Management Tool

Date: 01/23/2026

Time: 11:30 AM

Participants:

- Praveen M
- Ravikumar
- Sabareeshwaran
- Samuel Kiruba
- Joshua Alwinking
- Muthu Rama Lingam
- Jayaprathap
- Naveen Kumar
- S Sahaya Sherin
- Anto Jeffrin G

Agenda:

1. Requirement presentation and clarification
2. Discussion on UI flow and development approach
3. Finalization of refined project requirements
- 4 . Assignment of next action items

Action Items :

No	Action Items	Action Owner
1	Create a minimal working skeleton of the application based on refined requirements	S Sahaya Sherin, Anto Jeffrin G
2	Maintain a doubt & clarification document and circulate it among team members	S Sahaya Sherin, Anto Jeffrin G

Summary of Discussion points:

- The meeting was initiated by Samuel, who asked the interns to present the gathered project requirements.
- Sahaya Sherin presented the Project Requirement Document in detail, focusing on the Main User Page, explaining each section clearly.
- Praveen Mahendran shared inputs on the overall development process and suggested creating a UI flow diagram.
- He requested Muthu Ramalingam to demonstrate one of his UI flow diagrams using *draw.io* and explain its structure to the team.
- Following this, the team discussed various doubts and clarifications related to the project requirements:

Requirement Clarifications:

- **Efficiency Calculation:** Concluded to only calculate the overall efficiency of the meeting room.
- **Past Meeting History Storage:** Sabaree clarified that once the **monthly report** is generated in the Admin page, the historical data can be **deleted by the Admin** using a UI option.
- **Number of Meeting Rooms:** The number of meeting rooms is **not fixed**. The Admin will have an **Add Room button** to increase the number of rooms. ●
- **Participant Names & Cross-Team Meetings:** No need to consider the list of all participants.

Finalized Requirements:

Main User Page

- Display boxes representing all meeting rooms
- On clicking a room, a **24-hour timeline** appears showing:
 - Booked slots (highlighted in red)
 - Available slots
- “Book Meeting” button opens a dialog box requesting:
 - Team name
 - Scheduler name
 - Duration
 - Meeting title
- Booked duration appears colored on the timeline
- Hovering over booked slots displays booking details

- Total booked hours of the day displayed below the timeline
- Button to **view and download weekly booking report** at the bottom

Admin Page

- Admin login
- List of all employees with their team names
- Button to add new employees
- Button to add new meeting rooms

Development Guidance & Suggestions

- Sabaree advised starting development from **database design**, followed by **backend**, and then **frontend**.
- Joshva proposed a **manual in-time and out-time tracking method** using meeting room keys managed by the Admin and suggested collecting office-related details to improve room management efficiency.
- Nikitha suggested referring to the **Miqube app** for understanding existing meeting room bookingUI flows.

Minutes of Meeting

Title: intern task allocation

Date: 01/21/2025

Time: 11:30 AM

Participants:

- Praveen M
- Padigapati Venkata Nikitha
- Sabareeshwaran
- Joshua Alwinking
- Samuel Kiruba
- Muthu Rama Lingam
- Jayaprathap
- Naveen Kumar
- S Sahaya Sherin
- Anto Jeffrin G

Agenda:

1. Overview of the Meeting Room Booking Management project.
2. Understanding the problem statement and business objective
3. Requirement clarity and project design and methodology

Action Items:

No	Action Item	Action Owner
1	Prepare the Requirement Document of the Project.	S Sahaya Sherin, Anto Jeffrin G

Summary of Discussion points:

- **Samuel** briefed the team on the need for the project and provided an overview of the problem statement, which is the management of meeting room bookings by different teams and employees during office working hours.
- He explained that the objective is to build a web application to efficiently manage meeting room bookings.
- He emphasized the importance of being clear about project requirements and methodology before initiating development.
- Sabareeshwaran clearly explained the functional and page-level requirements of the

application.

The project should include:

- **Welcome Page:** Simple welcome message
- **Main User Page:**
 - Meeting room booking functionality
 - Input fields for Name, Team, In Time, Out Time, Start Time, End Time.
 - Auto-calculation of total duration and usage efficiency
 - Display of previously booked meetings at the bottom
 - Warning message for overlapping bookings
 - Navigation button to Admin page at the bottom-right corner ○

Admin Page:

- Simple admin login
 - CRUD operations for team and member details
 - Restriction allowing only registered teams and members to book meetings
 - Option to generate weekly efficiency reports for each meeting room in Excel format
- He also mentioned the technology stack to be used:
 - **Backend:** Python
 - **Database:** SQLite
 - **Frontend:** Any preferred frontend framework
 - Praveen M shared initial inputs through the meeting chat. His message highlighted the need to maintain a project tracker, MoM, and a clear project vision, and encouraged brainstorming on features, business objectives, requirements, and possible enhancements. These inputs were noted by the team for reference.
